

Meeting Minutes

Call to order

A meeting of [Software Engineering Group 4](#) was held at [Windows Lab](#) on 14/04/2016.

Attendees

Attendees included [Richard](#), [Wang](#) and [Donal](#).

Members not in attendance

Donovan

Reports

- Program works and fulfils specification
- Rich did quality/intro sections in doc
- Try and catch completed
- Wang finished the diagram
- Donal completed final touches to the code

Unfinished business

- Need to do some testing
- Donal may add polygon feature
- Wang may add undo/redo feature
- A bug in the bracket pair auto-completion method present when there are carriage returns in the input text

New business

- Rich to look at conclusion and results section
- Donal and Wang to look at code and see if any improvements can be made
 - Split Parser class into individual methods for each valid instruction
 - Replace Node names with single-character tokens in parsed text to allow for faster string traversal
 - More thorough error-checking in Parser, with a string describing any errors encountered being returned
 - An error frame displaying any errors encountered and possibly suggestions for corrections to syntax errors
